With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

This book looks at the link between voters and political party systems in Asian democracies, focusing on India, Indonesia, Korea and the Philippines. It discusses this link in terms of three distinct elements: the formation of voters preferences, the translation of preferences into votes, and the translation of votes into seats. The book goes on to discuss how far the general rules of political party systems and their underlying causal mechanisms such as strategic voting are apparent in these Asian democracies. In particular, it explores the extent to which electoral rules and social structural variables affect the process of transforming preferences into a political party system within the context of Asian politics.The extensive areas covered by the book overcome the traditional sub-regional division of Asia, namely, East, Southeast and South Asia.
