An engaging exploration of what it means to be asexual in a world that's obsessed with sexual attraction, and what we can all learn about desire and identity by using an ace lens to see the world What exactly is

## Download Free Ace Workbook

sexual attraction and what is it like to go through the world not experiencing it? What does asexuality reveal about consent, about compromise, about the structures of society? This exceedingly accessible guide to asexuality shows that the issues that aces face--confusion around sexual activity, the intersection of sexuality and identity, navigating different needs in relationships--are conflicts that all of us need to address as we move through the world. Through interviews, cultural criticism, and memoir, ACE invites all readers to consider big-picture issues through the lens of asexuality, because every place that sexuality touches our world, asexuality does too. Journalist Angela Chen uses her own journey of self-discovery as an asexual person to unpretentiously educate and vulnerably connect with readers, effortlessly weaving analysis of sexuality and societally imposed norms with interviews of ace people. Among those included are the woman who had blood tests done because she was convinced that "not wanting sex" was a sign of serious illness, and the man who grew up in an evangelical household and did everything "right," only to realize after marriage that his experience of sexuality had never been the same as that of others. Also represented are disabled aces, aces of color, non-gender-conforming aces questioning whether their asexuality is a reaction against stereotypes, and aces who don't want romantic relationships asking how our society can make room for them.

It ' s the revolutionary science study guide just for middle school students from the brains behind Brain Quest. Everything You Need to Ace Science . . . takes readers from scientific investigation and the engineering design process to the Periodic Table; forces and motion; forms of energy; outer space and the solar system; to earth sciences, biology, body systems, ecology, and more. subject taught in middle school: Math, Science, American History, English Language Arts, and World History. Inside the reader will find every subject 's key concepts, easily digested and summarized: Critical ideas highlighted in neon colors. Definitions explained. Doodles that illuminate tricky concepts in marker. Mnemonics for memorable shortcuts. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and state history standards, and are vetted by National and State Teacher of the Year Award – winning teachers. They make learning fun, and are the perfect next step for every kid who grew up on Brain Quest.

Written by three gifted-and funny-teachers, How to Ace Calculus provides humorous and readable explanations of the key topics of calculus without the technical details and fine print that would be found in a more formal text. Capturing the tone of students exchanging ideas among themselves, this unique guide also explains how calculus is taught, how to get the best teachers, what to study, and what is likely to be on exams-all the tricks of the trade that will make learning the material of first-semester calculus a piece of cake. Funny, irreverent, and flexible, How to Ace Calculus shows why learning calculus can be not only a mind-expanding experience but also fantastic fun.
