Guide And Physiology Bones Study

Bones come in several different types.

Long bones are longer than they are wide.

The length of the bone, or shaft, widens at the extremities (ends). Short bones are cubelike, about as long as they are wide.

Flat bones, such as ribs or skull bones, are thin or flattened. Irregular bones, such as

Get Free Anatomy And Physiology Bones Study

Guide vertebrae, facial bones, or hip bones, have specific shapes, unlike the other types of bones.

Anatomy and Physiology - CliffsNotes Study Guides

In short and irregular bones, spongy bone tissue is encircled by a thin layer of
