*Issue*

Many of the problems that can happen shortly after the transplant come from having the bone marrow

# Get Free Bone Marrow

wiped out by medicines or radiation just before the transplant. Others may be side effects of the conditioning treatments themselves.

*Stem Cell or Bone Marrow Transplant Side Effects*  
Stem cell or bone

# Get Free Bone Marrow

marrow transplants are complex treatments that carry a significant risk of serious complications. It's important that you're aware of both the risks and possible benefits before treatment begins. You may wish to discuss them with your

# Get Free Bone Marrow

treatment team and your family. Generally speaking, younger people who don't have any other serious conditions or those who receive transplants from a closely matched sibling are less likely to experience serious problems.
