Winner, 2013-2014 Asian/Pacific American Award for Literature, Adult Non-Fiction presented by the Asian Pacific American Librarian Association During the Cold War, Soviet propaganda highlighted U.S. racism in order to undermine the credibility of U.S. democracy. In response, incorporating racial and ethnic minorities in order to affirm that America worked to ensure the rights of all and was superior to communist countries became a national imperative. In *Citizens of Asian America*, Cindy I-Fen Cheng explores how Asian Americans figured in this effort to

shape the credibility of American democracy, even while the perceived “foreignness” of Asian Americans cast them as likely alien subversives whose activities needed monitoring following the communist revolution in China and the outbreak of the Korean War. While histories of international politics and U.S. race relations during the Cold War have largely overlooked the significance of Asian Americans, Cheng challenges the black-white focus of the existing historiography. She highlights how Asian Americans made use of the government’s desire to be leader of the “free world” by advocating for civil rights reforms, such as housing integration, increased professional opportunities, and freedom from political persecution. Further, Cheng examines the liberalization of immigration policies, which worked not only to increase the civil rights of Asian Americans but also to improve the nation’s ties with Asian countries, providing an opportunity for the U.S. government to broadcast, on a global scale, the freedom and opportunity that American society could offer.

This provocative history of the largest annual Chinese celebration in the United States—the Chinese New Year parade and beauty pageant in San Francisco—opens a new window onto the evolution of one Chinese American community over the second half of the twentieth century. In a vividly detailed account that incorporates many different voices and perspectives, Chiou-ling Yeh explores the origins of these public events and charts how, from their beginning in 1953, they developed as a result of Chinese business community ties with American culture, business, and politics. What emerges is a fascinating picture of how an ethnic community shaped and was shaped by transnational and national politics, economics, ethnic movements, feminism, and queer activism.

Chinese America - Stereotype and Reality is a comprehensive and fascinating textbook about the Chinese in America. Covering more than 150 years of history, the book documents the increasing importance of the Chinese as a social group: from immigration history to the latest immigration legislation, from educational achievements to socio-cultural and political accomplishments. Employing the author's detailed knowledge of the Chinese Diaspora, combined with her meticulous research, the book explores the history, diversity, socio-cultural structures, networks, and achievements of this often-overlooked ethnicity. It highlights how, based on their current position, Chinese Americans are well-placed to play a major role in future relations between China and the United States - the two largest economies of the twenty-first century.

The Routledge Handbook of Asian American Studies brings together leading scholars and scholarship to capture the state of the field of Asian American Studies, as a generation of researchers have expanded the field with new paradigms and methodological tools. Inviting readers to consider new understandings of the historical work done in the past decades and the place of Asian Americans in a larger global context, this ground-breaking volume illuminates how research in the field of Asian American Studies has progressed. Previous work in the field has focused on establishing a place for Asian Americans within American history. This volume engages more contemporary research, which draws on new archives, art, literature, film, and music, to examine how Asian Americans are redefining their national identities, and to show how race interacts with gender, sexuality, class, and the built

environment, to reveal the diversity of the United States. Organized into five parts, and addressing a multitude of interdisciplinary areas of interest to Asian American scholars, it covers: • a reframing of key themes such as transnationality, postcolonialism, and critical race theory • U.S. imperialism and its impact on Asian Americans • war and displacement • the garment industry • Asian Americans and sports • race and the built environment • social change and political participation • and many more themes. Exploring people, practice, politics, and places, this cutting-edge volume brings together the best themes current in Asian American Studies today, and is a vital reference for all researchers in the field.

Asian American Literature in Transition Volume Three: 1965–1996 offers a multidisciplinary perspective on the political and aesthetic stakes of what is now recognizable as an Asian American literary canon. It takes as its central focus the connections among literature, history, and migration, exploring how the formation of Asian American literary studies is necessarily inflected by demographic changes, student activism, the institutionalization of Asian American studies within the U.S. academy, U.S. foreign policy (specifically the Cold War and conflicts in Southeast Asia), and the emergence of 'diaspora' and 'transnationalism' as important critical frames. Moving through sections that consider migration and identity, aesthetics and politics, canon formation, and transnationalism and diaspora, this volume tracks predominant themes within Asian American literature to interrogate an ever-evolving field. It features nineteen original essays by leading scholars, and is accessible to beginners in the field and more advanced researchers alike.

In *Chains of Babylon*, Daryl J. Maeda presents a cultural history of Asian American activism in the late 1960s and early 1970s, showing how the movement created the category of "Asian American" to join Asians of many ethnicities in racial solidarity. Drawing on the Black Power and antiwar movements, Asian American radicals argued that all Asians in the United States should resist assimilation and band together to oppose racism within the country and imperialism abroad. As revealed in Maeda's in-depth work, the Asian American movement contended that people of all Asian ethnicities in the United States shared a common relationship to oppression and exploitation with each other and with other nonwhite peoples. In the early stages of the civil rights era, the possibility of assimilation was held out to Asian Americans under a model minority myth. Maeda insists that it was only in the disruption of that myth for both African Americans and Asian Americans in the 1960s and 1970s that the full Asian American culture and movement he describes could emerge. Maeda challenges accounts of the post-1968 era as hopelessly divisive by examining how racial and cultural identity enabled Asian Americans to see eye-to-eye with and support other groups of color in their campaigns for social justice. Asian American opposition to the war in Vietnam, unlike that of the broader antiwar movement, was predicated on understanding it as a racial, specifically anti-Asian genocide. Throughout he argues that cultural critiques of racism and imperialism, the twin "chains of Babylon" of the title, informed the construction of a multiethnic Asian American identity committed to interracial and transnational solidarity.
