What happens when we read novels and how do we make sense of them? Inge Wimmers explores these questions by developing a flexible poetics of reading that generously opens up the interpretive space between reader and text, while drawing on current theories of reading and combining rhetorical, pragmatic, and phenomenological approaches. "Poetics," here, is extended beyond the study of purely textual features to structures of exchange between text and reader. In a discussion of four major French novels from the seventeenth century to the present, the author not only sets up a broad-based poetics but also makes important contributions to contemporary issues in the study of narrative. Wimmers introduces the concept of multiple, interlocking frames of reference that allows for the integration of diverse critical perspectives. Analyzing La Princesse de Cleves, Madame Bovary, A la recherche du temps perdu, and Projet pour une revolution a New York, she shows how texts provide some frames of reference, while others are produced by the reader's disposition and cultural milieu. Originally published in 1989. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Gender is a hotly debated topic in the field of education. The role that language plays in educational contexts especially in the classroom has long been acknowledged. Innovatively combining approaches in the analysis of classroom discourse this book offers rich empirical findings as well as being theoretically interesting and valuable.

Guillaume de Machaut (1300-1377) was the master poet of fourteenth-century France. He established models for much of the vernacular poetry written by subsequent generations, and he was instrumental in institutionalizing the lay reader. In particular, his longest and most important work, the Voir dit, calls attention to the coexistence of public and private reading practices through its intensely hybrid form: sixty-three poems and ten songs invite an oral performance, while forty-six private prose letters as well as elaborate illustration and references to it's own materiality promote a physical encounter with the book. In Controlling Readers, Deborah McGrady uses Machaut's corpus as a case study to explore the impact of lay literacy on the culture of late-medieval Europe. Arguing that Machaut and his bookmakers were responding to contemporary debates surrounding literacy, McGrady first accounts for the formal invention of the lay reader in medieval art and literature, then analyses Machaut and his bookmakers' innovative use of both narrative and bibliographical devices to try to control the responses of his readers and promote intimate and sensual reading practices in place of the more common public performances of court culture. McGrady's erudite and exhaustive study is key to understanding Machaut, his works, and his influence on the history of reading in the fourteenth-century and beyond.

Author Anne Snowden Crosman, inspired by her own parents' graceful aging, interviewed hundreds of elderly people, each of whom continued to lead vibrant lives. She spoke with the famous and non-famous, those born in this country and those who had immigrated, some who had endured a difficult life, others who had known a life of privilege. To each she posed the same question: What was their secret of living long and well?
