On the way to work this morning the engine management light on my 2014 64-plate Ford Focus 1.6 TDCI came on, no warning beeps or anything, just the light came on. I carried on to work as there didn't appear to be anything different with the way the car was driving. When I left work this evening the engine management light came on again immediately when I started the car but still appears to ...

Two engines are on offer for the performance version of the Ford Focus: a 2.3-litre petrol and a 2.0-litre diesel. The 2.3-litre petrol, a variant of which is found in the Mustang, produces 280hp and 420Nm of torque. While that is 30hp more than the old model, it's the latter figure that makes the biggest difference in everyday driving.
