The Only Essential Oil Guide You'll Ever Need

Essential oils are organic compounds derived from plant sources such as roots, bark, flowers and seeds. They are complex chemical compounds and not technically oils at all! They are extracted using a variety of methods to capture the scented particles, leaving many of the other chemical constituents of the plant behind.

Beginners Guide to Essential Oils - Holistic Shop

Essential oils are concentrated aromatic compounds extracted from plants. A pure essential oil is a natural product taken from a single plant species. Not all plants produce essential oils, but in the ones that do, essential oils can be extracted from the stems, leaves, flowers, roots or fruits.

A Beginner's Guide to Essential Oils - Oshadhi Essential Oils

A good way to understand essential oils is to think of them as the blood of plants. Like blood, essential oils seal cuts and trigger hormonal responses in plants when they are threatened. These oils are so essential for plant vitality that without them, plants would die. Unlike human blood, essential oils only come from specific parts of plants.
