Initiatives are research-fueled "communities of engagement" where faculty, students, and alumni connect with practitioners in the field to develop insights that drive impact.

When facing a difficult management challenge, wouldn't it be great if you could turn to a panel of experts to help guide you to the right decision? Now you can, with books from the Judgment Calls series. Drawn from the pages of Harvard Business Review, these interactive, solutions-oriented guides allow readers to access the wisdom of leading experts as they tackle familiar and perplexing business situations. These engagingly written books will help managers improve problem-solving skills and make better judgment calls under fire.A preface provides an overview and sets the context for using these provocative case studies as learning tools in corporate classrooms. A relevant chapter from an HBE volume introduces the topic as a refresher course. Finally, an appendix of resources such as executive summaries, guiding questions, and a list of further reading rounds out the book. Judgment Calls provide insight into a variety of real world difficulties and offer solutions that managers will find both sound and practical. Our ideal reader is the business traveler who's thinking about this very issue, sees the book in the airport, and throws it in his or her briefcase to read on the plane.This volume, tentatively titled "Bob's Meltdown and Other Stories from the Frontlines of Management" looks at the most common issue in workplaces—employee behavior. What should you do when a star employee loses his temper in public? Worse yet, what if your protege seems to be coming unglued? All this and more!

The guide all MBAs and exec ed students need. If you're enrolled in an MBA or executive education program, you've probably encountered a powerful learning tool: the business case. But if you're like many people, you may find interpreting and writing about cases mystifying and time-consuming. In The Case Study Handbook, Revised Edition, William Ellet presents a potent new approach for efficiently analyzing, discussing, and writing about cases. Early chapters show how to classify cases according to the analytical task they require (making a decision, performing an evaluation, or diagnosing a problem) and quickly establish a base of knowledge about a case. Strategies and templates, in addition to several sample Harvard Business School cases, help you apply the author's framework. Later in the book, Ellet shows how to write persuasive case-analytical essays based on the process laid out earlier. Examples of effective writing further reinforce the methods. The book also includes a chapter on how to talk about cases more effectively in class. Any current or prospective MBA or executive education student needs this guide.

This book presents complete, well-organized coverage of the broad expanse of Texas real estate law, with its many special features and complexities. Jacobus discusses what the law has been in the past, before moving to what it is in the present—all with a perfect balance of principle and practice. The Seventh Edition reflects many major changes in and additions to the law throughout recent times.

Historian David Moss adapts the case study method made famous by Harvard Business School to revitalize our conversations about governance and democracy and show how the United States has often thrived on political conflict. These 19 cases ask us to weigh choices and consequences, wrestle with momentous decisions, and come to our own conclusions.

Case method teaching immerses students in realistic business situations—which include incomplete information, time constraints, and conflicting goals. The class discussion inherent in case teaching is well known for stimulating the development of students' critical thinking skills, yet instructors often need guidance on managing that class discussion to maximize learning. Teaching with Cases focuses on practical advice for instructors that can be easily implemented. It covers how to plan a course, how to teach it, and how to evaluate it. The book is organized by the three elements required for a great case-based course: 1) advance planning by the instructor, including implementation of a student contract; 2) how to make leading a vibrant case discussion easier and more systematic; and 3) planning for student evaluation after the course is complete. Teaching with Cases is ideal for anyone interested in case teaching, whether basing an entire course on cases, using cases as a supplement, or simply using discussion facilitation techniques. To learn more about the book, and to see resources available, visit teachingwithcases.hbsp.harvard.edu.

New breakthrough thinking in organizational learning, leadership, and change Continuous improvement, understanding complex systems, and promoting innovation are all part of the landscape of learning challenges today's companies face. Amy Edmondson shows that organizations thrive, or fail to thrive, based on how well the small groups within those organizations work. In most organizations, the work that produces value for customers is carried out by teams, and increasingly, by flexible team-like entities. The pace of change and the fluidity of most work structures means that it's not really about creating effective teams anymore, but instead about leading effective teaming. Teaming shows that organizations learn when the flexible, fluid collaborations they encompass are able to learn. The problem is teams, and other dynamic groups, don't learn naturally. Edmondson outlines the factors that prevent them from doing so, such as interpersonal fear, irrational beliefs about failure, groupthink, problematic power dynamics, and information hoarding. With Teaming, leaders can shape these factors by encouraging reflection, creating psychological safety, and overcoming defensive interpersonal dynamics that inhibit the sharing of ideas. Further, they can use practical management strategies to help organizations realize the benefits inherent in both success and failure. Presents a clear explanation of practical management concepts for increasing learning capability for business results Introduces a framework that clarifies how learning processes must be altered for different kinds of work Explains how Collaborative Learning works, and gives tips for how to do it well Includes case-study research on Intermountain healthcare, Prudential, GM, Toyota, IDEO, the IRS, and both Cincinnati and Minneapolis Children's Hospitals, among others Based on years of research, this book shows how leaders can make organizational learning happen by building teams that learn.

Teaching and the Case Method delves into the special role of teacher and students in the case method learning process. Schools that want to use the case method more effectively can use this book to teach groups of faculty how to apply case method techniques. For the first time, too, a book about case method teaching attempts to show how the method can be applied in a liberal arts setting. A liberal arts module in the book presents an innovative program for instructors who want to experiment with discussion teaching in traditional arts and science areas. The book focuses on a wide range of knotty problems faced by most instructors, experienced or new, creating an opportunity for them to learn from each other. It's main purpose is to provide a rich opportunity for both professional school and liberal arts instructors to develop their own discussion leadership skills, and to further the process of learning for both themselves and their students. [Publishers website]

WITH NEW ANALYSIS OF HBS AND THE FINANCIAL CRISIS When Philip Delves Broughton abandoned his career as a successful journalist and enrolled in Harvard Business School's prestigious MBA course, he joined 900 other would-be tycoons in a cauldron of capitalism. Two years of Excel shortcuts and five hundred of HBS's notorious business case studies lay ahead of him, but he couldn't have told you what OCRA was, other than a vegetable, or whether discount department stores make more money than airlines. He did, however, know that HBS's alumni appeared to be taking over the world. The US president, the president of the World Bank, the US treasury secretary, the CEOs of General Electric, Goldman Sachs and Proctor & Gamble - all were bringing HBS experience to the way they ran their banks, businesses and even countries. And with the prospect of economic enlightenment before him, he decided to see for himself exactly what they teach you at Harvard Business School. Philip Delves Broughton's hilarious and enlightening account of his experiences within Harvard Business School. Philip Delves Broughton's hallowed walls provides an extraordinary glimpse into a world of case study conundrums, guest lectures, Apprentice-style tasks, booze lugging, burn-outs and high fliers. And with HBS alumni heading the very global governments, financial institutions and FTSE 500 companies whose reckless love of deregulation and debt got us into so much trouble, he discovers where HBS really adds value - and where it falls disturbingly short.

Two years in the cauldron of capitalism—"horrifying and very funny" (The Wall Street Journal) In this candid and entertaining insider's look at the most influential school in global business, Philip Delves Broughton draws on his crack reporting skills to describe his madcap years at Harvard Business School. Ahead of the Curve recounts the most edifying and surprising lessons learned in the quest for an MBA, from the ingenious chicanery of leveraging and the unlikely pleasures of accounting, to the antics of the "booze luge" and other, less savory trappings of student culture. Published during the one hundredth anniversary of Harvard Business School, this is the unflinching truth about life in the trenches of an iconic American institution.
