Practice, training and exposure to unfamiliar ideas and experiences play essential roles in shaping creativity. Even something as simple as living in a big city promotes creativity because close contact with other humans breeds new ideas, explains Edward Glaeser in “ Engines of Innovation .”.

*Picasso Creative Writing (CCC)\*: Inspired! The #Science of ...*

As creativity became established as a discipline, scholars realized that creativity depends on being practiced. Creativity reveals itself in accomplishments and deeds, rather than in words. While a sound theoretical approach still was important, more and more emphasis was put on developing practical creativity techniques.

*History of the concept of creativity - UKEssays.com*

If you want to get creative give your brain some TLC. That slightly odd looking grey matter found at the top of your head is a complex and amazing thing. Not only does it keep you alive but its responsible for every mood, task and idea we have. To complete each of these things the brain produces a large number of chemicals or neurotransmitters, they can result in us having laser focus, put us on a creative roll or, on the other hand, can leave us not wanting to stray from the sofa or get out ...
