Servo motion control applications. Using one standard Ethernet/IP network for an entire machine - including Motion, Control, I/O, and HMI simplifies wiring, reduces panel layout costs, and allows easy integration into manufacturing and enterprise systems.

Kinetix 300 EtherNet/IP Indexing Servo Drives

The Kinetix 300 drive communicates with the MicroLogix 1400 controller via an EtherNet/IP connection. Each Kinetix 300 drive must have a unique IP address and needs to be configured with MotionView OnBoard software contained within the drive. This chapter

...

You can use the Kinetix 300 drive with the MicroLogix™ 1400 controller to achieve a simple and cost-effective component motion solution. Setup via a web browser lets you implement no n-coordinated, independent indexing moves, and the ability to control the indexing moves on an EtherNet/IP network.
