An adventurelike never before...Walt, had the greatest joy over thirty years of an uplifting marriage with Teresa, the love of his life. Now he has no idea if he can endure this greatest loss of Teresa's passing. At first, he retreats, giving their home to his daughter and their grandkids. He decides to move into The Delwaski Senior Center. Little does Walt know that life has new delightful surprises for him. A new adventure awaits Walt, but is he ready for it?

In *Ontology and Closeness in Human-Nature Relationships*, Neil H. Kessler identifies the preconceptions which can keep the modern human mind in the dark about what is happening relationally between humans and the more-than-human world. He has written an accessible work of environmental philosophy, with a focus on the ontology of human-nature relationships. In it, he contends that large-scale environmental problems are intimate and relational in origin. He also challenges the deeply embedded, modernist assumptions about the relational limitations of more-than-human beings, ones which place erroneous limitations on the possibilities for human/more-than-human closeness. Diverging from the posthumanist literature and its frequent reliance on new materialist ontology, the arguments in the book attempt to sweep away what ecofeminists call "human/nature dualisms. In doing so, conceptual avenues open up that have the power to radically alter how we engage in our daily interactions with the more-than-human world all around us. Given the diversity of fields and disciplines focused on the human-nature relationship, the topics of this book vary quite broadly, but always converge at the nexus of what is possible between humans and more-than-human beings. The discussion interweaves the influence of human/nature dualisms with the limitations of Deleuzian becoming and posthumanism's new materialism and agential realism. It leverages interhuman interdependence theory, Charles Peirce's synecism of feeling and various treatments of Theory of Mind while exploring the influence of human/nature dualisms on sustainability, place attachment, common worlds pedagogy, emergence, and critical animal studies. It also explores the implications of plant electrical activity, plant intelligence, and plant "neurobiology" for possibilities of relational capacities in plants while even grappling with theories of animism to challenge the animate/inanimate divide. The result is an engaging, novel treatment of human-nature relational ontology that will encourage the reader to look at the world in a whole new way.

This book collects the contributions presented at the international congress held at the University of Bologna in January 2007, where leading scholars of different persuasions and interests offered an up-to-date overview of the current status of the research on linguistic universals. The papers that make up the volume deal with both theoretical and empirical issues, and range over various domains, covering not only morphology and syntax, which were the major focus of Greenberg's seminal work, but also phonology and semantics, as well as diachrony and second language acquisition. Diverse perspectives illustrate and discuss a huge number of phenomena from a wide variety of languages, not only exploring the way research on universals - tersects with different subareas of linguistics, but also contributing to the ongoing debate between functional and formal approaches to explaining the universals of language. This stimulating reading for scientists, researchers and postgraduate students in linguistics shows how different, but not irreconcilable, modes of explanation can complement each other, both offering fresh insights into the investigation of unity and diversity in languages, and pointing to exciting areas for future research. • A fresh and up-to-date survey of the present state of research on Universals of Language in an international context, with original contributions from leading specialists in the field. • First-hand accounts of substantive findings and theoretical observations in different subareas of linguistics. • Huge number of linguistic phenomena and data from different languages analyzed and discussed in detail.

This monograph is the continuation and completion of the monograph, "Intelligent Systems: Approximation by Artificial Neural Networks" written by the same author and published 2011 by Springer. The book you hold in hand presents the complete recent and original work of the author in approximation by neural networks. Chapters are written in a self-contained style and can be read independently. Advanced courses and seminars can be taught out of this

brief book. All necessary background and motivations are given per chapter. A related list of references is given also per chapter. The book's results are expected to find applications in many areas of applied mathematics, computer science and engineering. As such this monograph is suitable for researchers, graduate students, and seminars of the above subjects, also for all science and engineering libraries.

This book provides a comprehensive analysis of glottalization in word-final syllables in Italian. Combining theory-based and experimental approaches, the book sheds light on the source of word-final glottalization, the contextual factors determining its occurrence, and the acoustic correlates which characterize its production.

A book on social work supervision is desperately needed to bridge the gap between the demands of the field and the absence of literature. Social Work Supervision: Contexts and Concepts aims to provide readers with basic knowledge of theories, research, and practice of supervision. The book addresses the needs of social work supervisors, frontline practitioners, students, and educators and contains a comprehensive literature review of the historical development, theories and models, and empirical research studies of the subject. Equally important, this is a book from practice experience in supervision that enhances the competence of supervisory practice. It will help social workers, supervisors, and administrators to realize and revitalize their "mission" in social work, that is, to benefit clients.
