Great Migrations: Whales (National Geographic Readers)  
Summary: This National Geographic text for kids is about the Great Migration that several species of animals, including the Monarch Butterfly, take every year. Evaluation: This text was a great selection of facts for students. This book was not boring just spouting off facts but was actually interesting to read.

Great Migrations: Butterflies (National Geographic Readers)  
Based on TV's Great Migrations series, this slender book opens by introducing the term migration and the three animals to be discussed. Each 12-page chapter focuses on one species, with a number of excellent color photos showing the animals in their habitats as well as a clearly written, large-print text commenting on their lives, their reasons for migrating, and threats to their survival.

This exciting reader follows the story of the longest and the  
most demanding elephant migration on the planet. Living at  
the furthest corners of the hot and dry Sahara Desert, the  
very margins of where elephants can survive, hundreds of  
these great creatures make a dangerous but necessary  
journey as their main source of food and water dries up and  
they must go in search of more.

About National Geographic Readers: Great Migrations  
Amazing Animal Journeys Every year like clockwork, animals  
both big and small are driven by a natural instinct to move, in  
order to survive. On both land and sea, they fight the odds  
and the forces of nature to breed, feed, or lead and carry on  
for future generations.
