It includes discussions on configuration, operation and maintenance of these systems.

Certain problems associated with Navy hardware availability and system effectiveness have been traced to inadequacies in the content, media, format, production, and control of the technical manuals for those systems. This report describes a long-term development program which is committed to solving the Navy's problems involving technical manuals through the formulation, development and test of a Navy Technical Manual System (NTMS). Included is a description of NTMS, and a detailed program plan which the Naval Ship Research and Development Center (NSRDC) will implement during FY 75 and beyond.
