~~Picturing Medical Progress From Pasteur~~

Summary. In four parts this book uses a wide variety of images--caricatures in newspapers, comic books, advertisements, and photojournalism of Life magazine--to explore attitudes to physicians and medical progress in the mass media from the late nineteenth century to the mid-twentieth century. Each section centers on a specific type of image and the analysis addresses change in perception of doctors and their achievements by privileging crucial moments of newsworthy events and discoveries.

But Hansen undeniably takes readers back to an era when the names of great physicians were known to every schoolchild and funding for medical research, not coincidentally, flowed abundantly from Congress. Picturing Medical Progress From Pasteur to Polio contains 130 images that well illustrate Hansen's core arguments. He claims that the great advances historians might name for the 19th century--anesthesia, listerian antiseptis, path-breaking surgery--were unknown to the general public.
