1-34 Flight Manual. Memorize the airspeeds for minimum sink and best glide. Consider proper approach speeds for varying surface winds and turbulence. There are some features of the 1-34 that are very different from other sailplanes you've been flying. One of the more obvious is noticed as you walk up to the glider - it's all metal construction.

Schweizer SGS 1 -34 Pilot Briefing

The 1-35 is an all-metal aircraft with a monocoque fuselage. The wing has a single spar and the stressed skin features multi-stringers for stiffness, to best retain airfoil shape and laminar flow. The aircraft's elevator and rudder are fabric covered. The 1-35 carries 320 lb (145 kg) of water ballast in two wing tanks.
