What made the Sopranos finale one of the most-talked-about events in television history? Why is sudoku so addictive and the iPhone so darn irresistible? What do Jackson Pollock and Lance Armstrong have in common with theoretical physicists and Buddhist monks? Elegance. In this thought-provoking exploration of why certain events, products, and people capture our attention and imaginations, Matthew E. May examines the elusive element behind so many innovative breakthroughs in fields ranging from physics and marketing to design and popular culture. Combining unusual simplicity and surprising power, elegance is characterized by four key elements—seduction, subtraction, symmetry, and sustainability. In a compelling, story-driven narrative that sheds light on the need for elegance in design, engineering, art, urban planning, sports, and work, May offers surprising evidence that what's "not there" often trumps what is. In the bestselling tradition of *The Tipping Point*, *Made to Stick*, and *The Black Swan*, *In Pursuit of Elegance* will change the way you think about the world.

How Cool Are Penguins is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

Trade in screen time for fresh air and family fun with adventures and experiments from the host of HGTV's *Room Crashers*. Slacklining, edible bugs, tarp surfing, and more! In this awesome follow-up to the hugely popular *Handy Dad*, extreme sports athlete and TV host Todd Davis gathers more than thirty projects and activities sure to get kids outside and entertained for hours. With easy-to-follow instructions, helpful photographs, and detailed line illustrations, *Handy Dad in the*

Great Outdoors is packed with all the essentials. From simple campsite know-how to more ambitious building projects (tepee anyone?), plus a few pranks for good measure, this book has something for every family and every place—be it the backcountry or the backyard.

Water Management Challenges in Global Change contains the proceedings of the 9th Computing and Control for the Water Industry (CCWI2007) and the Sustainable Urban Water Management (SUWM2007) conferences. The rationale behind these conferences is to improve the management of urban water systems through the development of computerbased methods. Issues such as economic globalisation, climate changes and water shortages call for a new approach to water systems management, which addresses the relevant technical, social and economic aspects. This collection represents the views of academic and industrial experts from a number of countries, who provide technical solutions to current water management problems and present a vision for addressing the global questions. The themes underlying many of the contributions include energy and material savings, water savings and the integration of different aspects of water management. The papers are grouped into three themes covering water distribution systems, sustainable urban water management and modelling of wastewater treatment plants. The water distribution topics cover asset and information management, planning, monitoring and control, hydraulic modelling of steady state and transients, water quality and treatment, demand and leakage management, optimisation, design and decision support systems, as well as reliability and security of water distribution systems. The sustainable urban water management topics include urban drainage systems, water reuse, social aspects of water management and also selected facets of water resources and irrigation. Computer control of wastewater treatment plants has been seen as less advanced than that of clean water systems. To address this imbalance, this book presents a number of modelling techniques developed specifically for these plants. Water Management Challenges in Global Change will prove to be invaluable to water and environmental engineering researchers and academics; managers, engineers and planners; and postgraduate students.

Nothing beats the companionable crackle of an open fire. Fires invite us to sit and share stories or watch in contemplative silence. We feel drawn to the flickering flames, the gentle curls of aromatic smoke and reassuring radiant heat. Snuggled under a blanket, toasting crumpets and listening to the pleasing pops of burning wood - what better way to spend a winter's evening? Or, come the summer, few pleasures are richer than cooking food, perched around a campfire, waiting for the stars to come out. But for all this talk, how many of us know how to build a fire? Would we know which kinds of trees burn best? Could we make our own firelighters or build the perfect fire stack? The Little Book of Building Fires is a richly illustrated pocket guide to sourcing, seasoning and storing firewood, choosing kindling and tinder, and how to build and light the perfect fire. From campfires to

woodburners, bonfires to open hearths, this book blends practicality with personal experience and will get you back in touch with your ancient firemaking instincts.

Although his poems were not generally well received by critics during his lifetime, his reputation grew after his death, and by the end of the 19th century, he had become one of the most beloved of all English poets. He had a significant influence on a diverse range of poets and writers. Jorge Luis Borges stated that his first encounter with Keats's work was the most significant literary experience of his life. The poetry of Keats is characterised by sensual imagery, most notably in the series of odes. This is typical of romantic poets, as they aimed to accentuate extreme emotion through the emphasis of natural imagery. Today his poems and letters are some of the most popular and most analysed in English literature. Some of the most acclaimed works of Keats are "I Stood Tip-toe Upon a Little Hill," "Sleep and Poetry," and the famous sonnet "On First Looking into Chapman's Homer."

Text of the Agreement (under the Yukon Umbrella Final Agreement) between the Tlingit Indians of the Teslin area of southern Yukon, on self government, further to Chapter 24 of the Final Agreement.
