So, she agrees to a pact with her best friend, Asher McMillan: if neither of them are married by the time she turns 35, they'll get hitched. That's five full years of searching for The One. Surely she'll meet Mr. Right by then? The problem is she doesn't know Asher quite as well as she thinks. Taking a job redecorating his bachelor pad, Zara learns he has hidden depths-depths that tug at her heartstrings. Hard. And then disaster strikes. She starts to develop feelings for him, the guy who doesn't do relationships. It's getting complicated, and Zara doesn't need complicated. But could her back-up guy be The One after all? Someone pushes your buttons. You feel rage, fear, sweaty palms, unbidden tears—you feel like a kid. We've all experienced moments when we lose control of a situation and ourselves. Now, in *Growing Yourself Back Up*, the first book to explain the idea of emotional regression to the general reader, bestselling author John Lee identifies the circumstances that cause these seemingly uncontrollable feelings and shows how they are directly tied to our experience as children. No adult, explains Lee, need ever experience the helpless feelings of childhood again. Here are his proven methods and visualization exercises, developed in his popular workshops, for recognizing, preventing, and diffusing regression in ourselves and others. He teaches, for example, that adults cannot be abandoned, they can only be left; if we're feeling abandoned we're regressing. He also reminds us that no matter how overwhelmed we are, adults always have options; if we believe we don't, we're in a regression. *Growing Yourself Back Up* will show you how to: * develop strong emotional boundaries and convey them to others * learn the Detour Method that reverses regression * confront without regressing * communicate with the authority figures who push your buttons * minimize regression at family functions Lee offers hope—as well as practical strategies that work—for conquering those childlike feelings of powerlessness that are almost always rooted in regression.
