Process Economics Program Report 172. Published September 1985. The new, world-scale production facilities in Saudi Arabia and Western Canada represent significant additions to the global capacity for basic petrochemical production; for ethylene derivatives, the new Saudi facilities represent about 4% of estimated 1990 world capacity, with the Canadian facilities accounting for a somewhat smaller percent.

Economics of Petrochemical Production in Saudi Arabia and ...

Jubail and Yanbu, petro- chemical industry hubs in Saudi Arabia, are cases in point. Producers in these loca- tions could capture infrastructure-related synergies across plants through feedstock and product exchanges. This approach could prove especially valuable as the use of liquid feeds sourced from refineries in- creases in the Middle East.

Middle East Petrochemical Industry Needs to Reinvent Itself

ExxonMobil opened this crude-based ethylene cracker in Singapore in 2014. In Yanbu, a massive industrial town on Saudi Arabia’s Red Sea coast, two Saudi state-owned firms—the oil company Saudi Aramco and the petrochemical maker Sabic—are planning a new complex that could prove to be a bellwether for the next decade in petrochemicals.

Why the future of oil is in chemicals, not fuels

06 August 2018 Dewey Johnson R. J. Chang. Several crude oil-to-chemical (COTC) projects being planned or started in Asia and Saudi Arabia threaten to reshape the global petrochemical industry in the coming years. COTCs configure a refinery to produce maximum chemicals instead of traditional transportation fuels.
